With over 2 years of experience, my team and I led the implementation of automation tools and pipelines at Bisa Bank that improved the development process by 80%. At AGETIC, we developed a module as part of a larger system that receives a large volume of logs and processes them to display statistical information.

PROFESSIONAL EXPERIENCE

Bisa Bank   **La Paz, Bolivia**
QA Tester   *Jan–Jul 2025*

- Developed and implemented pipelines to improve software delivery from design to deploy.
- Implemented CI/CD practices to improve software delivery efficiency, reducing errors and delivery times, and cutting deployment times by more than 80%.
- Designed and implemented integration tests for new internal systems.
- Performed manual tests on legacy system maintenance features.
